

SQL - Linked server ile Test Canl Kullanc Eleme

EBIFlow sistemleri arasında kullanc bilgisi elemek için aadaki sorgu kullanilabilir.

Linked server - SQL

```
declare @linkedservername as nvarchar(100)
Set @linkedservername = '1.1.1.1\SQLSRV'

declare @dbname as nvarchar(100)
Set @dbname = 'EBIFlowDB'

DECLARE @sql nvarchar(MAX);
SET @sql='
INSERT INTO schPerson
select * from [' + @linkedservername + '].'+@dbname+'.dbo.schPerson
where Id not in (select Id from schPerson)

INSERT INTO schUser
select * from [' + @linkedservername + '].'+@dbname+'.dbo.schUser
where Id not in (select Id from schUser)

INSERT INTO schEmployee
select * from [' + @linkedservername + '].'+@dbname+'.dbo.schEmployee
where Id not in (select Id from schEmployee)

INSERT INTO schLocation
select * from [' + @linkedservername + '].'+@dbname+'.dbo.schLocation
where Id not in (select Id from schLocation)

INSERT INTO schOrganizationalUnit
select * from [' + @linkedservername + '].'+@dbname+'.dbo.schOrganizationalUnit
where Id not in (select Id from schOrganizationalUnit)

INSERT INTO schOrganizationalUnitMember
select * from [' + @linkedservername + '].'+@dbname+'.dbo.schOrganizationalUnitMember
where Id not in (select Id from schOrganizationalUnitMember)
'

exec (@sql)
```
